

# Questionnaire and Observations for Early Identification of Asylum Seekers Having Suffered Traumatic Experience

**PROTECT** Process of Recognition and Orientation of Torture victims in European Countries to facilitate Care and Treatment

## 1. What is the purpose of the Questionnaire?

- The PROTECT Questionnaire at hand has been developed to facilitate the process of receiving Asylum Seekers in accordance with the directives of the European Council.\*
- The Questionnaire facilitates the early recognition of persons having suffered traumatic experiences, e.g. victims of torture, psychological, physical or sexual violence.
- Asylum Seekers having suffered such traumatic experiences should be referred to professionals of the Health Care System at an early stage in the asylum process in order to avoid deterioration and chronic manifestation of health problems and enable adaptations in reception conditions and asylum procedure.

## 2. When to use the Questionnaire?

- Upon arrival in the receiving country first aid and physical shelter should be provided. Only after a period of rest (e.g. 7/10 days) it is appropriate to carry out an interview with the Asylum Seeker using this Questionnaire.
- The Questionnaire should be applied even under difficult circumstances, rather than being neglected.
- Sometimes psychological problems caused by traumatic experiences begin to appear later. In which case the Questionnaire should be filled out a second time and the rating may have to be corrected.

\* With respect to article 17 in particular but also to articles 15 and 20 the Council Directive laying down minimum standards for the reception of Asylum Seekers (2003/9/EC of 27<sup>th</sup> January 2003) and with particular respect to article 12 §3 and article 13 §3 indent a) of the Council Directive on minimum standards on procedures in Member States for granting and withdrawing international protection (2005/85/CE of 1<sup>st</sup> December 2005).

## 3. How to apply the Questionnaire?

- Before asking the set of questions, please read the following short introduction to the Asylum Seeker to inform him or her about the purpose of the Questionnaire and to support an environment of trust and reassurance.
- The Questionnaire establishes a rating system ("low risk", "medium risk" or "high risk") for having suffered traumatic experiences.
- After completing the Questionnaire a copy should be given to the Asylum Seeker with the recommendation that he or she submit this paper whenever meeting with a Health Care System professional, a legal advisor or a reception official.
